

ProNet Rebates

ProNet Rebates is a web-enabled Rebate Management System (RMS) designed specifically for buying group administrators and management to accurately record, calculate, and distribute rebate reports to member companies in a highly efficient and cost-effective manner. Know your group earned rebates even before your suppliers do....

Group Rebates Manager

ProNet Rebates supports several industry-standard rebate calculation methods to include: volume-flat, volume-tiered, volume-growth, manufacturer add-on, marketing allowance, e-commerce, etc. The web platform includes six (6) pre-defined administrator reports and a multi-page member rebate package report. Reports are exportable to several standard formats to include MS-Excel®, Acrobat Reader® PDF, TIFF, XML, and others. ProNet Rebates is provided with an intuitive data entry interface and spreadsheet import capability. Purchase the **ProNet B2B Document Exchange** to add real-time transaction data population and calculation of your supplier program rebates.
