

Document Exchange Platform

ProNet B2B Document Exchange

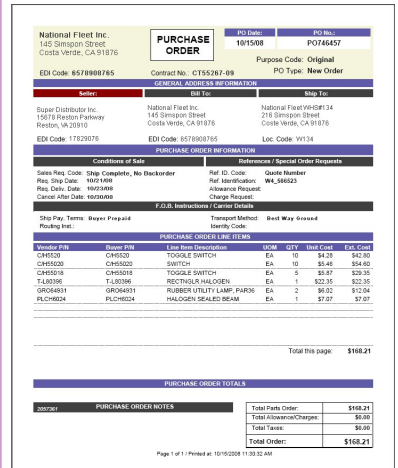

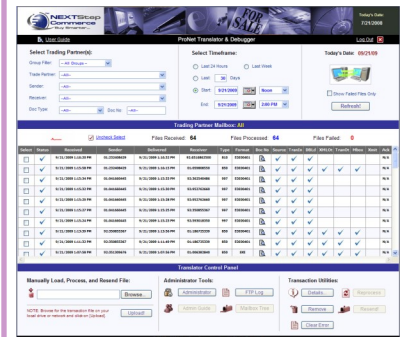

ProNet B2B Document Exchange is a robust web-enabled EDI/XML translator and document management system, enabling the B2B exchange of electronic quotes, orders, invoices, and payments between buyer and seller. Shorten order-to-pay cycle times and reduce transaction fees by implementing your own electronic exchange today...

Group Commerce

ProNet B2B Document Exchange provides the technology components necessary to setup and operate your own business-to-business document exchange. The platform provides a comprehensive suite of web-enabled applications and Microsoft® SQL-Server 2008 Data Warehouse for storing and managing transaction data. The exchange supports industry-standard electronic transaction set formats to include: ASC-X12 EDI, cXML/XML, and custom Flat-File formats. The exchange supports several communications methods to include: FTPS, SFTP, HTTP/S, AS2, Db2Db, dial-up, and others.

The administrator and trading partner dashboards are provided for monitoring and managing transaction flows between your buyers and sellers. Trading partners can search, view, print, and download transactions 24 x7 via a standard Internet browser. **Over 3,000,000 documents successfully exchanged.**
