

ProNet Community

ProNet Community is a web-based portal platform designed specifically for buying groups to manage and maintain the flow of information provided to their member companies and supplier trading partners. Save dollars through the paperless and timely distribution of critical business information. Improve communications, increase partner program awareness, and maximize overall management effectiveness.

Private Group Portal

ProNet Community is a Microsoft® ASP.NET architected portal application, which requires “little-to-no” website programming experience required to create, populate, and maintain the portal for your buying group. The portal is provided with a library of web components, which are placed on a layout template to create professional web portal pages. Many of the components are designed specifically for communicating information pertaining to your buying group’s preferred supplier programs, weekly specials and promotions, industry news & events, contact information, and more... **Transform your buying group into a highly-efficient, communicative, paperless organization.**

ProNet Community Key Functionality
