

# ProNet Marketplace

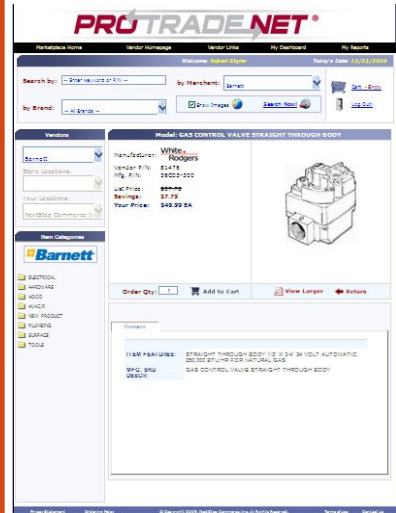

**ProNet Marketplace is a robust multi-vendor shopping mall application, enabling your buying group members to quickly locate, review, and purchase essential products and services online from supplier program partners. A single sign-on is all they need to Buy Now!**

Group Purchasing

ProNet Marketplace employs the “one-stop” shopping mall model to facilitate member sales from program suppliers. By providing single sign-on access, members can quickly & easily purchase direct and indirect materials (i.e. computers, office supplies, uniforms, etc.) via embedded or linked-to supplier partner catalogs. The platform provides everything you need to setup, populate, and maintain your private marketplace. When integrated with the ProNet B2B Exchange, orders can be forwarded and translated into any number of different formats (EDI, XML, FF, etc.) as required by your supplier partners.

*Increase supplier product awareness, sales, and rebate returns today...*
